

TENSION CANOPY

www.coolawnings.co.nz

The tension canopy is a steel structure designed and built by our own engineer. It is covered with PVC fabric, and is waterproof. We manufacture special brackets to attach to your building, and can provide flashing and gutters. It is custom made to a very high standard and is designed to deal with a wide range of weather conditions.

Interest free and no repayments for 6 months.

- » Cool Awnings custom-make tension canopies to fit your home or business.
- » Tension canopies are made from galvanized steel, powder coated and covered with waterproof fabric and sealed to your building.
- » We have a large range of aluminium shapes available depending on the size of the awning
- » We recommend the use of polyester or PVC fabrics to minimize stretching of the fabric.
- » Fabric is tensioned over the frame and attached into place with rope track.
- » Our awnings are installed by our experienced awning installation team.
- » Large fixed frame awnings can be braced into the building or stabilized with poles to the ground and the aluminium can be powder coated to match your fabric.
- » All our awnings come with a 5 year guarantee on fabric and hardware
