

Outdoor Fabric Products Association of New Zealand

FABRIC CARE LABEL 4[®]

These instructions will maintain the appearance and extend the functional life of the fabric

- Acrylic Canvas
- Nylon or Polyester Cloth (coated or uncoated)

PROHIBITIONS/WARNINGS

- Do not dryclean
- Avoid the use of soap and detergents, cleaning fluids or insecticides as they may damage the coating and promote leakage
- Avoid machine washing as it may remove surface coatings
- Hand washing is preferable
- For maximum durability, use moderate cleaning methods

GENERAL CARE INSTRUCTIONS

Sponge or hose regularly. More stubborn stains can be sponged with a very weak liquid soap solution then hosed or rinsed thoroughly. Care instructions cover most outdoor applications

SPOT CLEANING/SPECIAL TREATMENTS

Regular dry brushing using a SOFT brush followed by sponging with warm water will remove most normal soiling. After regular cleaning, these fabrics may lose their water repellent finish. A water repellent coating can be re-applied by using a proprietary brand of fabric protector that is recommended for each type of fabric.
