

EASY SHADE with winch

The Easy Shade awning with winch unit attaches to an existing structure and is controlled by a gearbox or motor.

- » The fabric is held on a roller with a spring, which holds the fabric under tension. When you want to wind the fabric out, just turn the crank handle and the rope and pulley system brings the fabric out as far as you want it.
- » The Easy Shade with winch unit can be mounted above or below your pergola, and runs on rafters.
- » Existing structure is required.
- » The Easy Shade with winch is NOT suitable for rain protection.
- » Size restrictions: max 3m extension, and 4.5m width.
- » This is an affordable option for a pergola or under a conservatory.

Interest free and no repayments for 6 months.
