

FLAT PANEL

The flat panel awning is an affordable alternative to curved canopy awnings. It is custom made to a very high standard and is designed to deal with a wide range of weather conditions. The flat panel is attached permanently to the building and poles are normally used to secure the extension. The flat panel can also be fixed to existing structures including solid fences.

- » Cool Awnings custom-make flat panel awnings to fit your home or business.
- » Flat panels are made from extruded aluminum covered with waterproof fabric and sealed to your building.
- » We have a large range of aluminum sizes available, and use stronger extrusions depending on the size of the awning.
- » We can design your frame and attach drop curtains to make a complete outdoor room.
- » We recommend the use of PVC fabrics as they have greater longevity and are waterproof.
- » Our awnings are installed by our experienced awning installation team.
- » Awnings less than 20m² on the ground floor generally do not require building permits.
- » The aluminum can be powder coated to match your fabric or as a contrast.
- » All our awnings come with a 5 year warranty on fabric and hardware.
